**ETIC Nord-Sud** shall cooperate with the various cooperation and social integration channels in order to adapt their actions and operations to the local situation.

Our consultancy contributes to the evolution of cooperation practices to the purpose of sustainable development. Our structure promotes the reciprocity of North-South relations through the implementation of different methods of consultancy support and evaluation.

Our philosophy is to support and strengthen our partners' capabilities both in managing their projects and in decision-making.

As an interface structure, ETIC Nord-Sud operates for the establishment of balanced and durable relations between institutional actions and participation approaches, fostering intercultural exchanges and mediation.

### STEP-BY-STEP ORGANISATION OF THE PROJECT

## DECISION-MAKING SUPPORT: CONSULTING/ EVALUATION/MONITORING

Through its survey, analyses and proposals, **ETIC Nord-Sud** helps to give your cooperation and struggle against poverty programmes an efficient and objective orientation.

The flexibility of our operation practices enables us to respond to topical requirements and to suggest a new monitoring action through:

- **Evaluations carried out directly** by our consultants or **in cooperation** with a contributor appointed by you,
- **Sequential evaluations** during the project cycle (feasibility study/ex-ante, mid-term, final and ex-post),
- **Multiform** (instrumental or operational) and **multi-disciplinary** (transversal or geographical) evaluations.

Our structure develops various support services such as:

- **External or partnership evaluation** as an evolving and critical management tool that may provide you with matter for thought on your operating methods and on the quality of your achievements,
- **Consultancy support** meeting specific needs during the implementation of your actions (organisational support, adjustment, reorientation),
- **Support to self-evaluation** of your local operators network through the development of a methodology and accurate analysis tools during a sequence of training/animation,
- The identification and organisation of an **evaluation monitoring process**, which defines targeted and relevant indicators throughout your project cycle.

Thus, ETIC Nord-Sud undertakes to:

- Promote evaluation and consultancy support as participation surveys,
- Develop methods and practices of social engineering,
- Reinforce the reliability of cooperation relations and social integration,
- Work out pragmatic and suitable proposals,
- Rationalize the use of financial resources,
- Stress on the feedback phases as a milestone of the dialogue between the different partners.

**ETIC Nord-Sud**  
7 rue Boileau  
94 210 La Varenne Saint Hilaire  
France

**ETIC Nord-Sud** analyzes and assesses their partners' capabilities using specific expertise based on a mix of:

- a pluridisciplinary know-how,
- different on-the-field experiences,
- an outside evaluation capable of formulating constructive criticisms,
- comprehensive approaches based on observation, listening and dialogue.

Our structure operates according to suitable logics and methods adapted to:

- institutional, socio cultural and economic environment,
- integration at global and local levels
- optimisation of consistency between resources and actions.

And last, our consultancy sets pragmatic proposals which:

- strictly and accurately conform to specifications,
- organise the network of operators,
- promote the emerging of innovating and participation-based approaches.

Thanks to their operational capabilities and flexibility, our team develops performances to match your objectives and work out solutions that are suitable to your requirements.
